Social & Environmental Audit - Prime Technologies 532 (SUPP_04226)

SYNTHETIC DEMO DOCUMENT

Audit date: 2026-07-09 | Site: Pune (IN) | Category: Couplers & draft gear (SIMULATED)
Framework: LkSG risk analysis / CSDDD-aligned on-site audit

Summary: HIGH RISK. 3 critical and 4 major findings.

Critical findings
C1 Working hours: 72-hour weeks recorded in the forging shop for 11 of 13 weeks sampled.
C2 Safety: two lost-time injuries at the drop forge in 2026; machine guards removed on press P-07.
C3 Recruitment fees paid by migrant workers to labour agents (avg. 1.5 monthly wages).

Major findings
M1 No documented grievance mechanism accessible to contract workers.
M2 Wastewater from pickling line discharged without treatment log.
M3 Fire exits blocked in warehouse B.
M4 No sub-supplier code of conduct for raw steel billets.

Required actions (LkSG section 7 remedial plan): corrective action plan within 30 days, re-audit within 6 months, reimbursement of recruitment fees, restore machine guarding immediately.

Auditor: Fictitious Assurance Ltd. This is a SYNTHETIC demo document.
