Security Incident Notification - Apex Solutions 669 (SUPP_05160)

SYNTHETIC DEMO DOCUMENT

Date: 2026-10-02 | Category: Electronics & PCBs (SIMULATED) | Plant: Brno (CZ)

On 2026-09-29 the supplier detected ransomware on its production planning servers (ERP/MES). Production of PCB assemblies was stopped for 6 days. Customer drawings for traction converter control boards may have been exfiltrated. Forensic investigation ongoing.

Impact for us: 2 open purchase orders (EUR 1.2M) delayed by ~3 weeks. NIS2 supply-chain notification may be required.

Requested actions: confirm affected drawings, rotate shared VPN credentials, request forensic report, review supplier against NIS2 supply-chain security requirements.

SYNTHETIC demo document.
